

EXTRA WET WATER

Low Foam Wetting Agent & Penetrant

- *Nonionic
- *Non-Flammable
- *Highly Concentrated
- *Makes Water Wetter

CAUTION: Keep out of reach of children. Do not take internally. See side panel for additional precautionary information.

60B92 NET CONTENTS GALLON(S)

This concentrated, biodegradable synthetic detergent wetting agent and penetrant is formulated to make water wetter for faster, deeper penetration BY THE REDUCTION OF SURFACE TENSION. Use For dust control as fire fighting aid, as a soil conditioner or an agricultural spreader/sticker. In agriculture, use as a pre treatment to condition soil for better, faster, penetration of fertilizers and herbicides. In construction, use as a dust control agent or to assist in the misting of concrete. Product acts to eliminate dry spots or puddles in turf grasses, sports fields, and parks and recreation areas.

DIRECTIONS FOR USE:

SOIL CONDITIONER & PENETRANT: Dilute product with water at a rate of 1:2000. Apply with pressure sprayer and allow to penetrate. **FIRE FIGHTING AID:** Depending on type of equipment, dilute product with water at a rate of 1:3000 to reduce surface tension and promote faster wetting action. **DUST CONTROL:** Dilute product with water at a rate of 1:2000, to spray over areas for dust compaction. Use a stronger dilution rate for longer dust control activity.

CAUTION: Do not take internally. If accidentally ingested, drink large amounts of water. Contact physician. For eye or skin contact, flush with water for 15 minutes. Seek medical attention if irritation persists. Keep container sealed when not in use. Avoid freezing. Rinse empty container before discarding in an authorized landfill site.
