CAUTION: Keep out of reach of children. Do not ingest.

70B02

NET CONTENTS

GALLON(S)

This highly concentrated, biodegradable formula consisting of detergents, wetting agents, foam stabilizers, and rinse additives for effortless, streak-free cleaning of automotive surfaces. The thick, rich suds cling to surfaces to remove dirt, grease, oil, road film, insects, bird droppings, tree sap, exhaust film, and gasoline residue from cars, trucks, buses, mobile homes, pickups, campers, boats, golf carts, travel trailers, recreational vehicles, taxicabs, delivery trucks, and other types of vehicles.

This product is highly concentrated, yet is so safe it will not remove waxes or polishes. Product goes into solution rapidly at all dilutions and may be used with hot, cold, hard or soft water. Rinse additives enable product to rinse away completely and leaves no soap film or detergent residue. Product may be applied through a pressure washer, hose, or by manual application.

RECOMMENDED DILUTIONS: Dilute at a rate of 1 to 3 ounces per gallon water.

Apply product to surface to be cleaned according to soil conditions. Agitate with soft brush or sponge if required. Rinse thoroughly. Best results are obtained if this product is done in a shaded area out of direct sunlight. No wiping or chamois required, but is recommended on glass windshields and windows.

CAUTIONS: Keep out of children. Do not store in freezing temperatures. If material comes in contact with skin or eyes, flush with water. If ingested, drink large amounts of water and seek medical attention.
