- *Restores Luster
- *Enhances Appearance
- *Protects Against Further Damage

CAUTION Keep out of reach of children. Do not ingest.
Protect from freezing temperatures.

70B10 Net Contents: 1 GALLON

This micro-emulsion, protectant and conditioner is formulated to penetrate and protect vinyl, plastic, rubber, finished wood, metals, leatherette, and many similar materials. Original beauty and luster can be restored and this product prevents further damage from moisture, ozone, ultraviolet rays, and oxidation which can cause dulling and embrittlement.

DIRECTIONS:

Prior to application, surface should be cleaned with an appropriate detergent material. Do not apply over grease, oil, dirt, or other soils. Apply product undiluted, using sprayer, sponge, or cloth, apply to surface and allow to penetrate for 2-3 minutes. Using a lean, dry, lint-free cloth, wipe away excess and buff surface to gloss. Repeat application periodically to extend protection and beauty. For best results, the initial application should consist of two coats of product. NOTE: Do not use on floors or fabrics.

CAUTION: Keep container sealed when not in use to prevent contamination. Do not take internally. If ingestion occurs, drink large amounts of water and contact physician immediately. For skin or eye contact, flush area with clean water for 15 minutes. Rinse empty container before discarding in an authorized landfill site.
