- \*Highly Concentrated
- \*Leaves Glossy Appearance
- \*Reduces Streaking, Corrosion  
& Weathering

## Protective Polish For Automatic Car Washes

**CAUTION:** Keep out of reach of children. For Industrial & Institutional Use.

**70B97      NET CONTENTS      GALLON(S)**

GLOSS WAX CONCENTRATE is a highly concentrated liquid that is applied through the wax dispenser in automatic car washes to give cars a glossy wax-like finish or can be applied manually. Excellent water beading provides protection and reduces drying time. GLOSS WAX CONCENTRATE makes it possible to do a quality job economically.

### DIRECTIONS FOR AUTOMATIC CAR WASHES:

- (1) Pour 5 gallons of Gloss Wax Concentrate into a clean 55 gallon drum or other container.
- (2) Insert hose to the bottom of the drum and fill with water (hot or cold). The incoming water will impart sufficient agitation to mix Gloss Wax Concentrate
- (3) Adjust the metering feed equipment to deliver the amount of this solution that provides best results. Usually 4 to 16 ounces of this solution diluted with approximately 1 gallon of water will yield excellent results, 1-32 to 1-8
- (4) Different concentrations and dosages should be evaluated to determine best results since the quantity of Gloss Wax Concentrate needed may vary with different water sources.

### DIRECTIONS FOR MANUAL OPERATIONS:

One part Gloss Wax Concentrate may be diluted with up to 640 parts water

**CAUTION: KEEP OUT OF REACH OF CHILDREN**
